

Express Sign-On is a next generation Single Sign-On solution that provides users with seamless and secured access to any thick and web based on-premise or cloud application from any device, anytime and anywhere. With Express Sign-On, users have to sign-in once and they don't have to type their User ID/Password again and again.

Built on industry leading and proprietary technologies, it offers a comprehensive suite of features that enable organizations to take control over its IAM challenges cost-effectively, quickly, and with ease.

Xpress Sign-On Features

User Convenience

Access all of your organization's application with one-click from a central Launchpad.

Single Sign-On

Enable Single Sign-On to Thick/Rich and web based application, on cloud or behind the firewall without a single line of code change to an application.

Security

Out-of-the box support for both Global and Application level Multifactor authentication.

Identity Store

Incomparable flexibility to work with your existing LDAP v3 compliant identity stores.

IAM Integration

Integrate with most existing identity and access management solutions and maximize your previous investment.

Audit and Report

Strong auditing and compliance reporting capabilities which integrate with Security Information and Event Management (SIEM) solutions.

Administration & Deployment

Smart Wizards to on-board any application in quick time without the need of app owners. Over 1500+ pre-configured applications. Deployable in-premise / on cloud / hybrid mode, up and running in matter of few hours.

With Xpress Sign-On

What makes us Unique?

Thick Client SSO

Provides seamless Single Sign-on to Thick client applications. Xpress Sign-On comes with powerful desktop login utility which completely eliminates need of even logging into browser to do SSO for Thick client.

Cross Browser SSO

Xpress Sign-On provides cross browser feature to support seamless navigation of conservative web applications to open in preferred browsers.

On Boarding

On-board unlimited applications with intelligent Do-It-Yourself wizard including support for multi-page application login.
