

Integrated Multi-Factor Authentication

Organizations and systems in general are looking to adopt alternate ways of authenticating users other than just a password. Our solution provides multiple other factors of authentication out-of-the-box with the ability to integrate additional types of authentication. The following factors are offered out-of-the-box:

- Challenge-Response
- SMS OTP
- Email OTP
- Soft Token
- Biometrics

Additional methods such as RFID, Proximity Cards, or any other preferred factor of authentication can be integrated.

Get in touch with us to understand how our solution can address your Multi-Factor Authentication requirements.

Xpress Sign On

Xpress Sign-On is a next generation Single Sign-On solution that provides users with seamless and secured access to any thick and web based on-premise or cloud application from any device, anytime and anywhere. With Express Sign-On, users have to sign-in once and they don't have to type their User ID/Password again and again. Built on industry leading and proprietary technologies, it offers a comprehensive suite of features that enable organizations to take control over its IAM challenges cost-effectively, quickly, and with ease.

Xpress IDaaS

An IDaaS solution can be prove to be the underlying layer of an organization's IT strategy and IT compliance policies. With its ease of adoption and use, organizations can save time, significantly improve compliance and increase IT productivity. With ILANTUS, the domain experience of 17 years coupled with our strength in world class technology enables our customers to achieve high value from their IDaaS investments and reap results year-on-year.
