

Godrej experiences ZERO Login with Xpress Single Sign-On & Password Management

Being India's one of the largest conglomerate founded in 1897, Godrej with its subsidiary and associate companies across 18 countries, diversely operates in sectors

such as real estate, consumer and agriculture goods, chemicals, security solutions, gourmet retail, and more. With their chemicals division ranking among India's leading manufacturers and exported over 80 countries, their consumer products are also rated as one of the best in the country. Today, Godrej enjoys the patronage of 1.1 billion consumers globally across consumer goods, real estate, appliances, agriculture, and many other businesses. In fact, their geographical footprint extends beyond Earth, with its engines now powering many of India's space missions.

With multiple entities having several hundred users accessing 7-8 applications every day along with keeping track of multiple passwords and the repeated efforts of signing in and out of applications was a critical issue to address for Godrej. They needed a solution to sync all their business entities to a single login platform. ILANTUS provided

Godrej adopts ILANTUS Single Sign-On and Password Management solutions

Company

Godrej

Headquarters

Maharashtra, Mumbai

Industry

Manufacturing

Solution Offered

Xpress Single Sign-On

Xpress Password

Employees:

9500

Objectives

- Simultaneous application sign-in upon machine login
- Single integration across entities
- Single password across applications and network
- Self-password resets from outside the corporate network
- In-house portal integration

Why ILANTUS

- Quick implementation across applications including Web and Thick client application
- Single Sign-On to SAP applications
- Integration capability across IAM platforms
- Integrated Windows Authentication (IWA): SSO upon machine login

Resolution

- Single login for all authorized applications
- SSO upon logging into the user machine
- Access to applications directly from Intranet portal

Benefits

- Faster application access across devices by preventing multiple application logins
- Self-password reset resulting in reduction of helpdesk calls by 85-90%
- Zero Lock-out period due to locked accounts or forgotten passwords
- Self-password reset when out of company domain
