

Ilantus Case Study

Large Energy Company

The client: UK based energy company developing
a new generation of nuclear power stations

Business Objectives

Implement a solution to make it convenient for employees to reset/change passwords and unlock their accounts anytime, anywhere, and minimize dependency on the IT service desk.

Business Challenges/Pain Areas

- Workflow disruptions due to business user account locks
- Lack of flexibility in resetting the password anytime, anywhere
- Employee productivity impacted - More than 30% of employees forget password, and 25% of employees have locked accounts
- High dependency on service desk for password reset/account unlock - Lack of flexibility with the existing password management tool

Business Benefits

- Eliminated workflow disruptions
- Improved employee productivity
- Increased agility among workforce
- Converted CAPEX to OPEX
- Users reduced sign-on experience with password synchronization. Users need to remember just one password across all enterprise applications
- Active Directory Password Synchronization with target applications

IT Challenges/Pain Areas

- High IT service desk cost
- Lack of secure access from anytime, anywhere
- Huge number of service desk calls

IT Benefits

- Secure access from any web-enabled devices
- Reduction in service desk calls by over 70%
- Reduction in cost associated with service desk
- Improved end-user experience
- Policy-based email reminders
- Mass user enrollment from HR system
- Self-registration prompt post Windows Login
